Gateway News

What this icon stands for

Labels and hard tags with this icon are specially developed and produced for Gateway. All tags and labels are thoroughly tested to maintain Gateway's high quality and performance.

AM and RF labels

: Custom-made AM and RF labels are designed to work perfectly with our systems

: Our deactivators are the best solution for deactiviation of our labels

: Remember that these labels only can be purchased from us!

Hard tags

: Our custom-made hard tags are designed to work perfectly with our systems

: Hard tags with the Gateway logo are developed and produced for Gateway

: Hard tags with the Gateway logo are available with Burnsafe

: Superlock on tags

: Remember that these hard tags only can be purchased from us!

Why choose hard tags with Burnsafe from Gateway?

The Burnsafe feature makes it more difficult and time-consuming for the thief when exposing the hard tag to fire.

When you buy our labels and hard tags you can be assured that you are getting the best solution!

Consumables

Multialarm – the tag with three alarm features

It activates the alarm system the same way a regular tag does.

The tag also contains electronics that will make it self-alarm. It triggers when the tag is tampered with or when passing through the alarm system. A tag which is triggered will alarm regardless of where it is, either inside or outside the store. It will alarm until staff resets the tag.

Multialarm

• Trigger system alarm
• Tag self-alarm when tampered with
• Alarm system trigger tag to self-alarm

Multialarm V2 AM
